

Make a console program that gives funny excuses for missing homework or assignment. Program should run basic and give random excuse each time.

- Ask user to enter student name
- Store excuse lines in array or vector
- Pick one random excuse
- Replace {name} with entered name
- Show result on screen

Minimum Templates : 10

- "{name} could not finish homework because laptop battery died."
- "{name} was ready to submit work but file disappeared."
- "{name} wanted to study but system started updating forever."
- Add multiline comments where needed
- Keep code short and clean
- No hard concepts

Output :

One random excuse every run using entered student name.

```
# Linux / macOS
g++ -std=c++17 -o excuse_generator excuse_generator.cpp
./excuse_generator

# Windows (MinGW)
g++ -std=c++17 -o excuse_generator.exe excuse_generator.cpp
excuse_generator.exe
```

Sample output:

```
=====
ExcuseMaster 9000 is Ready!
=====
Enter student name: Ahmed

-----
EXCUSE : Ahmed could not finish homework because laptop battery died at 99%.
-----
Good luck, Ahmed. They might believe it.
-----
```

What's inside:

Feature	Detail
Excuse templates	12 funny lines, all using <code>{name}</code> placeholder
Storage	<code>std::vector<std::string></code> as required
Random pick	<code>srand(time(nullptr))</code> seeds differently every run
Placeholder swap	Custom <code>replaceName()</code> handles all <code>{name}</code> occurrences
Empty name guard	Falls back to <code>"The Student"</code> if Enter is pressed
Comments	File header + section comments throughout

ExcuseMaster 9000 is Ready!
=====
Enter student name: dihrefender

EXCUSE : dihrefender was about to submit when the internet decided to take a personal day.

Good luck, dihrefender. They might believe it.
